To Whom it may concern,

I am writing this letter to qualify the working ability of Ahmed Amine Hachimi of whom has been working on a project called FLUX DATA.io for the past few months with my organisation The FLUX LIST.

Ahmed has proven to be a diverse and talented coder, being able to work in different languages and on many different aspects of our project from frontend with vue.js to backend with node.js sails js etc.

As a CEO It can be worrying to takes risks on developers that are still studying as sometimes they find it hard to focus on the project at hand but with Ahmed we were thoroughly surprised to see his focus and punctuality delivering many aspect of our sophisticated project before the suggested deadlines.

I wish him all the best and hope you'll enjoy working with him as much as we have.

Regards,

Oska. Zapete- Keene
(**CEO** / Founder)
